Annual Bull Sale

WEDNESDAY, APRIL 9, 2025

12 NOON MDT | LA JUNTA LIVESTOCK COMMISSION CO. | LA JUNTA, CO

SELLING: 23 2-YR OLD SALERS & OPTIMIZER BULLS
23 2-YR OLD HEREFORD BULLS
20 YEARLING SALERS & OPTIMIZER BULLS

Dear Fellow Cattlemen,

Greetings from the high plains of eastern Colorado. We have a super set of bulls this year ready for your inspection.

The two-year-old bulls were summered on short grass, then brought into the corrals through deep snow in November. These bulls are growing well on sorghum hay, alfalfa pellets, and sunflower pellets and have never had any grain this year or last. None of these bulls are carrying excess condition.

Our Salers and Optimizer bulls are out of top bloodlines in both the Salers and Angus breeds. You'll see Mac Conner 7C, Anders 29A, Wide Load, Navigator, Topeka 159T, and other proven lines on the Salers side. Angus sires include Hoover Dam, Summit, Mill Bar Hickok, and In Focus in the pedigrees. These are nice, growthy, and gentle bulls.

This year, Adam and Sarah have three outstanding sons of the very well-known CL1 Domino 0186H. These bulls have huge potential and have sold very well for Coopers, Churchill, and others. Our Foundation Herefords are primarily L1, tracing back to 26 Bar, Carpenter Williams, and Sensation. You'll like these bulls.

The yearling Salers bulls were still nursing and on summer pasture when we received two to three feet of snow the first week of November. The roads were shut down for a long time, and we had cattle we couldn't get to for two weeks. When we finally reached them, it was tractor-only access. We fed as much as we could when possible. Despite the conditions, we were thankful to have minimal death loss-just a couple of older cows-while the calves remained in good health. We are incredibly grateful for the help of good neighbors.

We didn't bring the calves home until December and weighed them in January, so the 205-day weights are lower than usual. However, these calves are eating well and growing fast now. They have good EPDs and are eye-catching.

If you have any questions or would like to look at the cattle, feel free to call. Thank you all for your interest and past business.

Sincerely,

Clinton Clark

 Home 719-446-5428
 Cell 719-464-1942

Sale Location

La Junta Livestock Commission Co.
 24026 CR 30.25, La Junta, CO 81050
 Located on the east side of La Junta, on the south side of U.S.
 Highway 50.

Online Broadcast

Online bidding will be available through LMA Auctions. To watch the live broadcast and bid online, visit www.LMAAuctions.com to register and apply for bidding. We recommend getting approved to bid at least 48 hours prior to the sale. If you have any questions or need assistance, please call LMA Auctions at 800-821-2048.

For those who would like to watch the sale **ONLY**, it can also be viewed at www.lmaauctions.com to see a live feed and audio of the sale. Although you cannot bid from this platform, feel free to give us a call to place a bid during the sale:

Adam Nuss 719-464-1942
 Sarah Nuss 970-310-8842
 Keo Honey 719-469-7784

Please try to call in advance and give us a heads up so you don't miss your bull.

Absentee Bids

Mailed or telephoned bids will be handled in all confidence if you are unable to attend the sale. Please contact La Junta Livestock or Clinton Clark in advance of the auction so we may assist you sale day.

Inspection of Cattle

Bulls are available for your inspection at any time on the ranch, so please call if you need directions. The bulls will be in the La Junta Livestock yards on Tuesday, April 8, 2025.

Registration

A certificate of registry will be transferred to the buyer on each registered animal sold after settlement has been made.

Health

At branding: 7-way with pink eye, Pyramid 5 and Mult Min 90.
At weaning: 7-way booster with pink eye, Pyramid 5, Autogenous Bacterin, and Mult Min 90.
Winter: Pour-on Ivermectin
Spring: As is done in some bull tests, every bull was given a magnet to help prevent hardware disease.

All bulls have passed a fertility test and breeding soundness exam. All 2-yr old bulls have been Trich tested.

Announcements

A supplement sheet will be available sale day with any up-to-date information, including scrotal measurements and current bull weights. This sheet and any announcements made from the auction block will take precedence over statements in this catalog.

Guarantee

All bulls are guaranteed to be breeders. Bulls are guaranteed against breeding injury for the first breeding season, which is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided or if the buyer prefers, credit will be given toward a bull at the following year's sale, less salvage value of the injured bull. Notification must be given to Clinton Clark prior to selling the injured bull.

Delivery

Free delivery to customers in the central US who purchase a bull for \$5,000 and up. All other customers we will split delivery costs with you 50/50.

Sensation, the sire of 350G was the high calving ease bull in the entire Hereford breed and is one of the highest bulls on record for maternal milk. We have used this bull for several years and now have 3-year old sons and daughters by him. They are great cattle. Sensation's calves are small at birth and very aggressive, grow well and have good carcass numbers. His daughters are not big but have excellent udders, milk well, are fertile, and take good care of their babies.

* A note about Angus and Optimizer Sires:

When sires of other breeds enter the Salers pedigrees, their EPDs all start out at zero. Therefore, sons of these Angus and Optimizer bulls can have lower EPDs.

For years we have selected Angus bulls that can handle high altitude.

American Salers Association

GOLD DAMS EXPLAINED

The ASA Gold Dam and Sire program recognizes Salers breeders' top producing cows within a herd based on number of calves weaned per cow exposed and weaning weight of calves. Cows and sires can be recognized from any environment because the list is based on within herd performance.

To become a Gold Dam, cows must meet a tough selection criteria.

- Gold Dams must have had a calf before they are 2.3 years of age and calve within a 395-day calving interval which allows the producers to calve heifers earlier than the main cow herd.
- Dam's must have a minimum of three natural (non-ET) calves with an average weaning ratio greater than 105.
- These are the top quality, most efficient cows in a herd. Only the top 2% of the registered cows make the Golden Dam list.

Gold Sires – Salers bulls can earn the title of Gold Sires by Siring five or more Gold Dams. Gold Dams and Sires can be identified in Salers pedigrees by an (*) behind each name in the pedigree.

Clark Anvil Ranch had 14 Gold Dam's in 2021, 12 in 2022 and 13 in 2023!
